

## RC4 DRUM OVERHAULING

## DRUM OVERHAULING

In the current economic climate the cost of Major Capital Equipment is a very serious option.

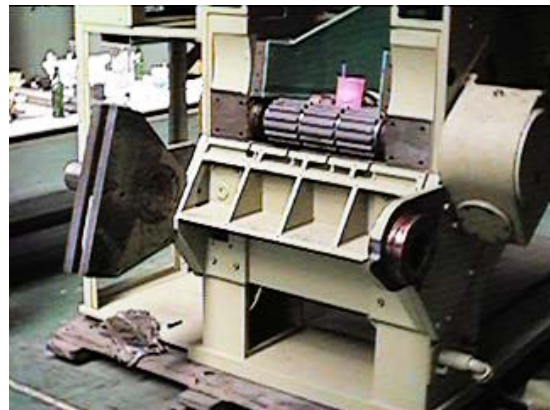

Don't put your cash at risk.

Extend the life of your existing machinery with cost effective :

“Assembly Overhauls.”

**Primary Engineering Associates**  
**Provide;**

- Time Served
- Fully Experienced
- Customer Orientated

## SERVICE ENGINEERS

All of whom are **Totally** committed in providing **Customers** with complete satisfaction.

## THE DRUM CARCASS

*Is a very expensive item.*

*All wearable components are removable.*

*Your existing carcass, once stripped down and cleaned, is ready for new parts to be fitted.*

*The result: an "as new" drum !!*

## GRINDER Removed

*First step is to remove the Grinder Assembly*

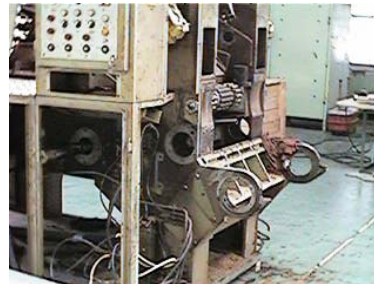

## DRUM Removal

*Next the Drum can be taken off*

## The Removed Drum Assembly

*Ready for overhauling.*

## Main Frame

*With the Drum assembly removed, the main frame can be cleaned and serviced.*

**PRIMARY ENGINEERING  
ASSOCIATES**

## DRUM Disassembly

The Drum can now be worked on in a convenient area.

## Individual Components

All items are removed from the Drum

## CARCASS

The Drum is taken to its lowest possible level-the bare Carcass.

## COMPONENTS

All Individual wearable items are then replaced.
